SUMMARY

UX Lead at Vodafone Qatar with about five years of designing digital products for telecom, banking, property and e-commerce. I take work from research and flows through to polished UI in Figma, and I can build the frontend myself, which makes handoff faster and catches problems early. I worked on the Gulf's first Instant SIM and eKYC journeys, and I lean on analytics to check what users actually do after launch, not just what they say in testing. Available for remote contract work across European and Gulf time zones.

EXPERIENCE

Digital User Experience Lead Oct 2022 – Present
Vodafone Qatar | Doha, Qatar

- Lead UX for Vodafone Qatar's customer web and app journeys, from research and user flows through to UI design and launch.
- Worked on the Gulf region's first Instant SIM and eKYC digital journeys, so customers can buy a SIM and verify their ID online without visiting a store.
- Use analytics and behaviour tracking to find where customers drop off, then redesign those steps and check the results after release.
- Build and publish web content and landing pages myself, which keeps design changes moving without a long developer queue.
- Work with product, marketing and IT teams to agree UX priorities that also hit business targets.
- Top Achiever award 2023 and 2024. Employee of the Month, March and July 2025.

UX App Developer Apr 2022 – Sep 2022
Guaranty Trust Bank | Freetown, Sierra Leone

- Designed customer journeys and app screens for the bank's digital products in Figma and Adobe XD.
- Built the matching HTML, CSS and JavaScript frontend in Scrum sprints, keeping the build true to the approved design.
- Kept interfaces consistent across the apps and produced brand graphics and ad creative.

Frontend UI/UX Designer and Developer Jul 2021 – Mar 2022
Tamawal Inc. | Riyadh, Saudi Arabia

- Designed and launched the company's bilingual website (left-to-right and right-to-left layouts), customer dashboard and mobile app.
- Ran regular usability tests on Figma prototypes and fed the findings into the next round of design.
- Built frontend pages in HTML, CSS and JavaScript from the approved designs.

WordPress Developer Aug 2021 – Nov 2021
CSI Properties | Kuala Lumpur, Malaysia

- Built and updated WordPress pages with the design team, keeping the site current and easy to use.

SELECTED PROJECTS

- Wapishi Online: UX and UI for a Kenyan food-ordering app, from user flows to final screens (wapishi.online).
- Sierra Sell: UX case study for an all-in-one e-commerce platform for Sierra Leone (Behance).
- HR Dashboard and Flixx Jobs: dashboard and job-search product designs with full case studies (Behance).
- 50+ freelance client projects since 2019 across web design, branding and e-commerce.

SKILLS

Design: Figma, Adobe XD, Sketch, Illustrator, Photoshop, Zeplin, design systems, wireframing, prototyping
